

Environmental Consciousness Drives Bradford Soap Works

Back in 2010, Dave Buckless of F W WEBB's Industrial Pump Division contacted Todd MacGregor of Eastern Reliability LLC with a critical Hydrochloric Acid storage application at Bradford Soap Works. Bradford Soap Works is a soap and detergent manufacturer dating back to the Civil War era and located in W. Warwick, RI.

Bradford was using a competitive manufacturer's tank which had just failed an annual internal inspection. Bradford's Plant Manager, Christian Jedson, and Maintenance Manager, Paul Russo, knew that a prompt tank replacement was in order.

Dave Buckless obtained application details and Eastern Reliability quoted an [ASSMANN ICT 6500](#) with 3" Full Drain Outlet (FDO) supplied with a high strength hastelloy C insert. The tank was delivered within 4 weeks of the order being placed.

The [ASSMANN ICT 6500](#) has been in operation for 6 years with no issues. Bradford Soap Works utilizes other Eastern Reliability products sold through F W WEBB. Bradford has a [Justin Tank \(FRP\)](#) on concentrated Brine and has recently purchased some [GoatThroat Dispensing Pumps](#) for alcohol based fragrances.
