

CHAMPION VALVES INC

Please link to the most current [Inventory List](#) of Champion Valves Inc., below. Champion manufactures and maintains inventory of the following types of valves:

Single Disc, Dual Disc, Silent and Nozzle Check Valves. Sizes from A Half Inch Through 72 Inches Diameter. Cast Iron, Ductile Iron, Carbon Steel, Stainless Steel Materials, Many High Alloys.

While all listed valves in our [INVENTORY LIST](#) are subject to a recent prior sale; please contact us if you do not see an item listed because it could be restocked and still be available now - when you need it. Also, because we have engineering and assembly capabilities in our facility, we can quickly build a valve that is not on the list. For example, we typically stock Buna-N elastomer valves, but we can often change the elastomer to EPDM or Viton from inventory. We can also interchange body and disc types to ship a valve not included on the inventory list. This versatility and response capability of Champion Valves, Inc., is a differentiator within the valve market place that allows us to make many valve configurations readily available to you. *On your time when you need it most!*
