

Prominent New England University Equipped with Eco-Friendly DEF Tank

Kraft Power headquartered in Woburn, Mass. recently supplied an [ASSMANN Double Wall \(IMT 1050\)](#) tank for Diesel Exhaust Fluid (DEF) to Wesleyan University.

DEF is an eco-friendly compound made up of 32% organic carbamide, UREA, and 68% purified or deionized water. The DEF is injected into the diesel exhaust stream in order to neutralize the pH and render the exhaust harmless to the environment.

For this project, [Kraft Power](#) supplied a back-up diesel/electric generator for Wesleyan University's Freeman Athletic Center. Being environmentally conscious, most institutions now require a DEF system for the back up diesel generation units. The system was supplied by Kraft Power to A-Z Corp., the project's general contractor.

[Eastern Reliability](#) regionally represents **ASSMANN Polyethylene Tanks**, **JUSTIN FRP Tanks**, **MASS Tank** for steel and high alloy tanks, **Plastic Concepts** for Plastics Fabrication, **EPG** for Landfill Leachate and Hazardous waste site pump, control and gas applications, and **Tylok International** for fittings, valves, and hose products. Eastern Reliability works closely with Industrial Distribution, OEM and Engineering firms to solve chemical storage, process and pumping problems.

Think of Eastern Reliability to solve all of your difficult Industrial and Chemical Tank and Transfer needs.

Thank you for your continued support.

Todd Mac

Contact me to learn more about storage tank requirements for *Diesel Exhaust Fluid* used for Selective Catalytic Reduction (SCR) units. I will be glad to help!

The DEF system is critical to operating in compliance -- so tank storage selection is critical.

If you have any questions regarding a recommendation for the right DEF storage tank please call or e-mail!
Thank you.
