

ASSMANN Polyethylene Tanks - What's The Difference?

The Difference is in the Process

Assmann Corporation polyethylene tanks and containment basins provide superior quality and service even under the most extreme chemical storage applications

- Single wall, double wall and conical tanks from 20 to 12,000 gallons
- Uniform wall thickness making them stronger and longer lasting

The highest standards of quality...

- NSF/FDA approved for potable water, food, and personal care/cosmetics
- Every tank is manufactured and tested per ISO 9001:2008 procedures
- American made in Garrett, IL and Marshal, TX

“The quality and service Assmann provides is second to none. Their tanks are designed to stand up to the most extreme conditions.”

Make sure you have the right tank for the job
