

Mass Tank & Eastern Reliability Partner with and Industrial Distributor to Solve a Difficult Tank Application

SOLUTIONS AND TANKS SUPPLIED

Inside Sales at a local industrial distributor contacted Todd MacGregor, of Eastern Reliability LLC, in late October 2012 with a request for a 5000 gallon pressurized hot water tank.

Once we dug into the application, we realized that the tank would be under very high pressure and that an 'off the shelf' tank would not be adequate. Eastern Reliability immediately asked got Mass Tank, of Middleboro, MA to be involved.

Since the tank was in the basement of a 40+ story building, we calculated the tank pressure at 200 psi, requiring that Mass Tank build a tank with the 3 levels of ASME Certified inspection.

The tank design changed a couple of times based on customer requests. In early January 2013, Mass Tank delivered a 68" x 330" custom 5000 gallon tank, with full ASME certification, to the customer's location in NYC.

Eastern Reliability represents ASSMANN Polyethylene Tanks, JUSTIN FRP Tanks, MASS Tank for steel and high alloy tanks, Plastic Concepts for Plastics Fabrication, INNOMAG Chemical Transfer Pumps and EPG Pumps for Landfill Leachate and Hazardous waste site pump, control and gas applications.

Think of Eastern Reliability to solve all of your difficult Industrial and Chemical Tank and Transfer needs.

Thank you for your continued support!

Todd Mac
