

Rain Water Harvesting Success - The Boston 101 Seaport Project

In August 2013, Todd MacGregor of [Eastern Reliability](#) was contacted by Brae Water regarding a 45,000 gallon rain water harvesting tank for the Boston 101 Seaport Project.

This project is currently being undertaken by [SKANSKA](#) as a design/ build/own project with design work provided by WSP Engineers in New LEED AP (Green Building initiatives). Local regulations require that a significant amount of rain water be retained and reused for various uses such as gray water for toilets or boiler water make-up.

After engineering review, design requirements increased the volume of the tank from 30,000 to 45,000 gallons. In order to fulfill the requirement for this highly specialized tank, Eastern Reliability involved [Mass Tank](#) of Middleboro, MA to complete the design and build the tank.

The tank was built and delivered on schedule. The images attest to the sheer magnitude of this project and how the Engineering support of Eastern Reliability and our highly talented Principal manufacturers, such as Mass Tank, can help you or your clients meet technical requirements, schedules and budget to complete a successful project!

[Eastern Reliability](#) regionally represents **ASSMANN Polyethylene Tanks**, **JUSTIN FRP Tanks**, **MASS Tank** for steel and high alloy tanks, [MASS Tank Inspections](#) providing Mandated 3rd Party Inspections for all types of tanks, **Plastic Concepts** for Plastics Fabrication, **EPG** for Landfill Leachate and Hazardous waste site pump, control and gas applications, **Tylok International** for fittings, valves, and hose products, and **Hydroquip** for Oil/Water Separators. Eastern Reliability works closely with Industrial Distribution, OEM and Engineering firms to solve chemical storage, process and pumping problems.

Think of Eastern Reliability to solve all of your difficult Industrial and Chemical Tank and Transfer needs.

Thank you for your continued support.

Todd Mac
