

## Manhattan Children's Museum Unusual Tank Application

When most of us think of tanks, we think of storing fluids or more likely storing chemicals. However, once in a while an unusual application comes along that makes this business even more interesting.

Back in early 2011, Tim Watkins of May and Watkins design contacted Todd MacGregor of Eastern Reliability with an unusual request. May and Watkins wanted to use 4 ASSMANN Polyethylene Tanks for an interactive display to help teach children about the inner workings of the human digestive process.

ASSMANN tanks supplied (1) ICT400, (1) ICT700, and (2) ICT1500 tanks pigmented in Red. These tanks were then customized into the display at the Manhattan Children's museum.

Eastern Reliability regionally represents ASSMANN Polyethylene Tanks, JUSTIN FRP Tanks, MASS Tank for steel and high alloy tanks, Plastic Concepts for Plastics Fabrication, INNOMAG Chemical Transfer Pumps and EPG for Landfill Leachate and Hazardous waste site pump, control and gas applications. Eastern Reliability works closely with Industrial Distribution, OEM and Engineering firms to solve chemical storage, process and pumping problems.

**Think of Eastern Reliability to solve all of your difficult Industrial and Chemical Tank and Transfer needs.**

Thank you for your continued support.

Todd Mac
