

Eastern Reliability and Assman Tanks help a major Food Plant located in Eastern Massachusetts save thousands of dollars in wastewater upgrade through value added engineering solutions

VALUE ADDED SOLUTIONS AND TANKS SUPPLIED

An industrial plastics distributor contacted Todd MacGregor of Eastern Reliability regarding a number of large tanks that were required for a wastewater treatment systems upgrade.

The original specification called for FRP tanks. However, the project budget was tight and ASSMANN was asked to do some 'value engineering' and provide high quality, ISO-9001 certified polyethylene tanks.

ASSMANN provided (1) 12,000, (2) 5,500, and (1) 5200 gallon tanks fitted with heat tracing and insulation and this resulted in savings of over **\$50,000** from the originally specified FRP tanks.

"The tanks have been installed for several years and the system is running great!"

Think of Eastern Reliability to solve all of your difficult Industrial and Chemical Tank and Transfer needs.

Thank you for your continued support. Happy New Year!

Todd Mac

Eastern Reliability represents ASSMANN Polyethylene Tanks, JUSTIN FRP Tanks, MASS Tank for steel and high alloy tanks, Plastic Concepts for Plastics Fabrication, INNOMAG Chemical Transfer Pumps and EPG Pumps for Landfill Leachate and Hazardous waste site pump, control and gas applications.
